

# Crafting: Jellyfish in a bottle

## Materials:

1. A transparent plastic grocery bag
2. A plastic water bottles.
3. Thread
4. Scissors
5. Food colouring (optional)

## Steps:

1. Flatten the bag and cut off the handle and the bottom part
2. Cut along both sides to split into 2 plastic sheets – by the way, we only use just one of them.
3. From the centre of the plastic sheet, fold it like a tiny balloon to make the head part and tie it with the thread – not too tight. You must leave a little hole in order to pour some water in the head part.
4. Put some water into the head part to make it be able to sink . You must leave some air inside to make be able to float up.
5. Fill up your water bottle.
6. Put your jellyfish in the bottle with a few drops of blue food colouring. Screw in the cap and that's all!
